

RATPAC 24 X 1.2kW 20 INCH DIMMER

Our virtually silent flagship dimmer: re-designed.

The 24x1.2 was our first product. Seven years later it has had a complete makeover: 120V LED tube compatibility, bump buttons for testing and an entirely new controller.

Tried and true design with over-sized solid state relays and rugged breakers. Equipped with rigging, hoisting points. Simple addressing with no menus. Dim/non-dim option with dip switch selections and bump buttons.

Stackable design. All Ratpac dimmers are ETL/CSA listed, and now include CRMX technology, allowing you control up to a quarter mile range with in line of sight. Transmit or receive with the flip of a switch.

RATPAC 24 X 1.2 kW 20 INCH DIMMER

INPUT: 120 VAC 3 PHASE E1016 CAMLOK
OUTPUT: 4 SOCAPEX, 24 CHANNELS,
